Who we are

About EGGER

The family company, founded in 1961, is a leading international manufacturer of wood-based materials with more than 11,000 employees and 22 production locations worldwide. EGGER is a full-range supplier for furniture and interior design, for wood construction and for wood-based flooring, making it a reliable partner for the furniture industry, wood and flooring retailers, and DIY stores.

Being a sustainable business is at the centre of EGGER's activities: The family business takes its responsibility for climate protection seriously and is committed to the ambitious Net Zero target by 2050. 65% of the wood used in EGGER wood-based materials already comes from recycling or sawmill by-products. At the end of their long service life, EGGER products are in turn largely recyclable and can be reintroduced into the cycle. EGGER is constantly working towards its goal of "creating more from the valuable resource wood" and thus enabling sustainable living and working.

Who we work with

Our partner Panel Plus

Our EGGER Industry Collection Asia is produced by our partner Panel Plus in Hat Yai, who is one of Thailand's leading manufacturers of wood-based materials that operates with high-quality manufacturing technology.

The Decorative Boards are produced in EGGER quality and comply with the following proven product specifications:

- Particleboards in accordance with EN 312, JIS A5908 and GB/T 39600
- MDF according to EN 622
- Decorative surfaces according to EN 14322 and JIS A5908
- All decorative boards fulfill the antimicrobial surface property according to ISO 22196 (= JIS Z 2801)
- ISO 9001 and ISO 14001 for quality assurance
- All decorative boards fulfill the highest requirements for simple and efficient further processing into furniture parts

Passion for a unique resource

Sustainability at heart

Anyone who is as closely associated with nature as we are already thought sustainably before it became a trend. EGGER takes its responsibility for people and the environment seriously. Doing business in a sustainable manner is therefore daily practice for us. Our partner in Hat Yai produces our products only from local wood resources and together, we always keep an eye on the effects of our actions on our environment. The responsible use of resources is our goal. State-of-the-art technologies and the continuous improvement of our processes are the answer.

Touch & feel

Textures and surfaces

In the era of advancing digitalisation, the sense of touch has become increasingly important. That is why we pay particular attention to our textures and surfaces. The harmonious feel which complements the decor image completes the overall design. With expressiveness, character, depth and naturalness, we come as close as possible to the original.

STP1 Velvet

The STP1 Velvet surface provides a velvety texture.

STP2 Woodpore Matt

The matt wood pores with irregular interruptions create the characteristics of natural and untreated wood. This gives the STP2 Woodpore Matt surface an authentic texture.

STP3 Textile

The STP3 Textile surface supports the textile character of the decor haptically.

Note: All our shown and mentioned decors are reproductions. The printed decor illustrations correspond to a section of 500 x 500 mm. Due to variables in the printing process, colours may vary slightly from the actual product.

We add value

Our services

Whether analogue or digital: EGGER services support you in your everyday work.

- Image data and technical datasheets
- Samples: They are a great tool for impressing your customers. Please contact your sales partner for sample orders.
- Local EGGER sales offices
- Plant visits
- Product training

Finishing touches

Decor Match

Our decor variety of uni colours, wood and material reproductions are not only available for our boards. We also offer the matching edges for every decor.

Please contact your sales partner for more information.

Neutral & timeless

Whites & unis

White and uni colours are essential for modern applications and we also find them as main components in furniture and interior design, not just as mere accent colours.

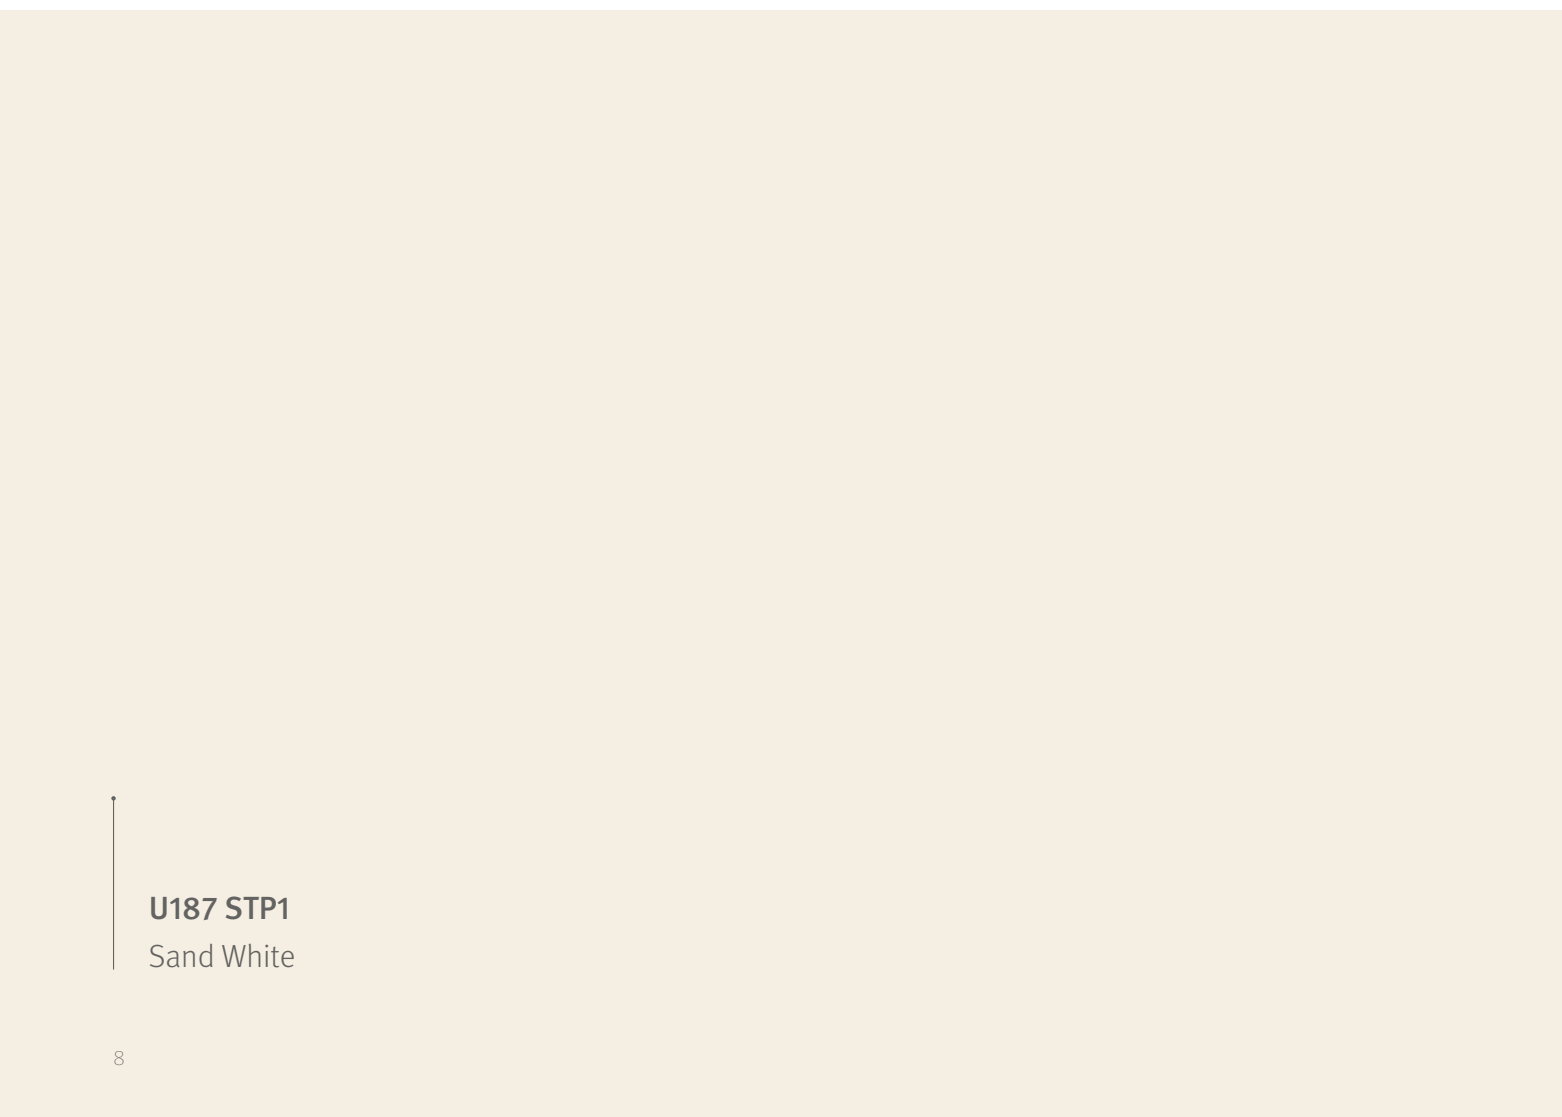

Our collection includes different grey tones and white colours for a complete spectrum of options, as well as the timeless contrast of black.

Tactile & textured

Material reproductions

Textiles are becoming increasingly important in interior design. They are no longer only used as inlays in drawers and cupboards, but can now also be seen more frequently in fronts.

Textiles bring cosiness into a room and enhance emotionality through their special texture. The beige colour scheme fits harmoniously with classic dark wood or modern to warm-grey variants.

Authentic & natural

Wood reproductions

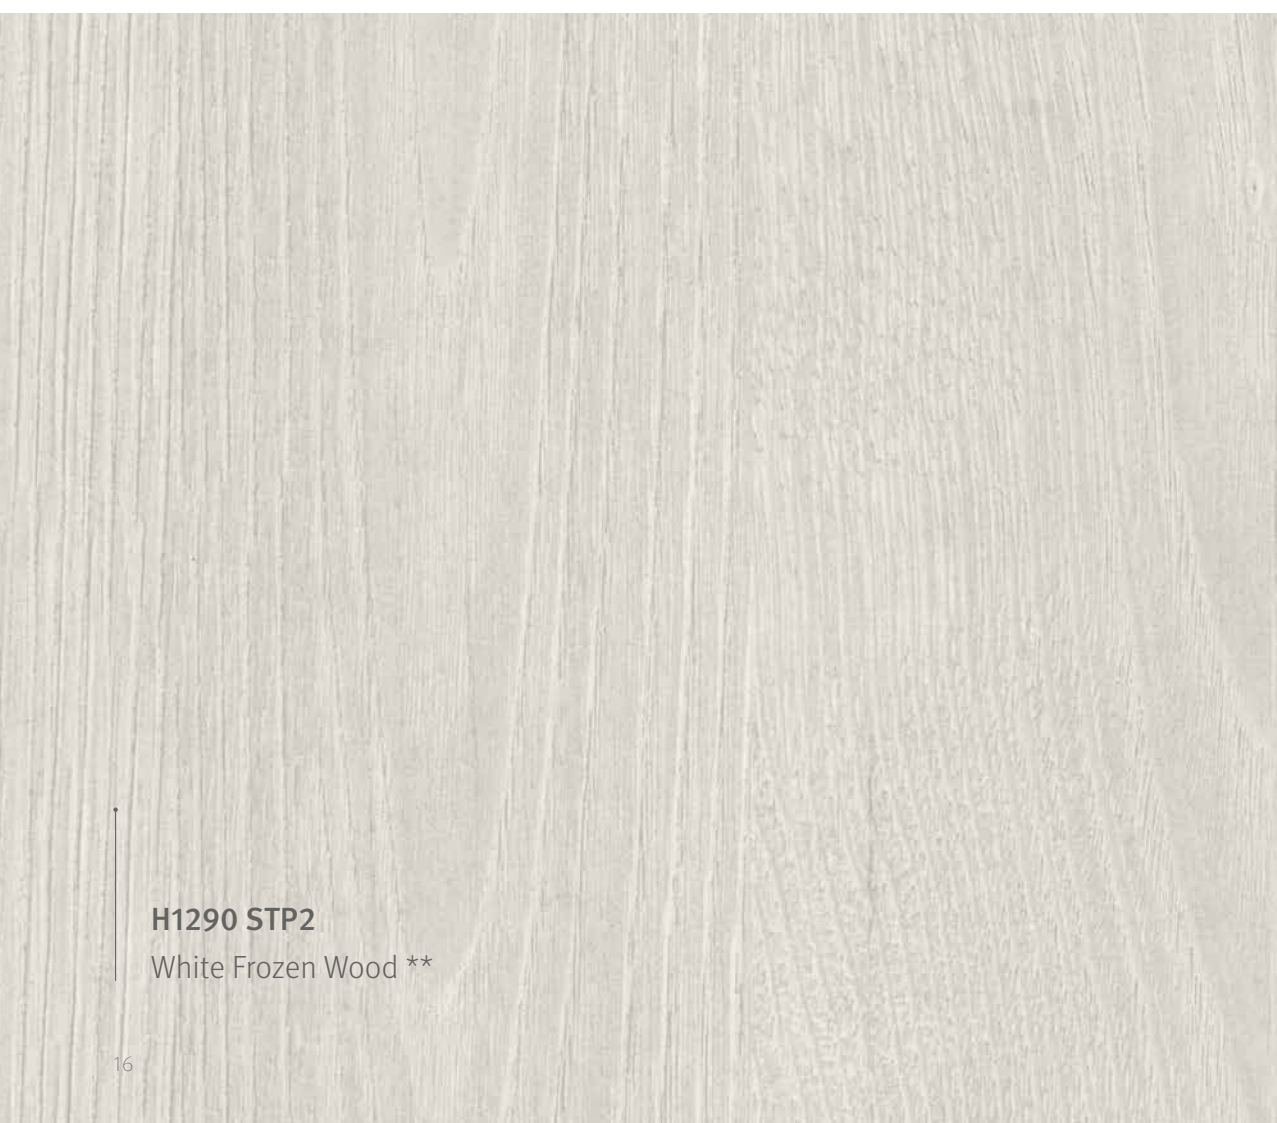

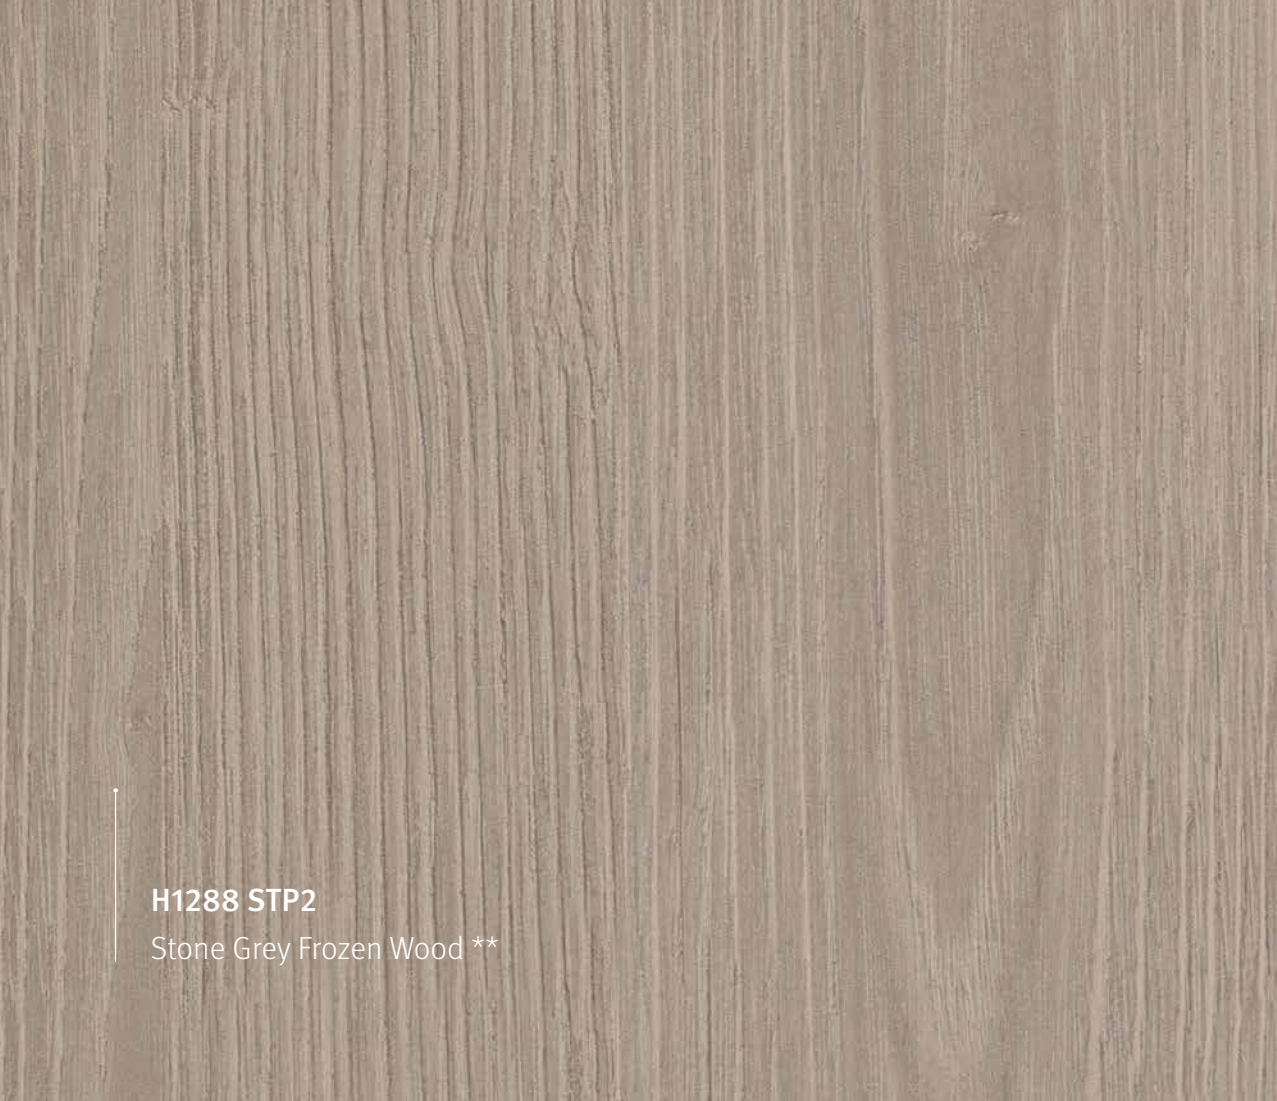

Everyone loves wood. It is one of the timeless trends in interior design and furniture construction. Its natural look and warm feel enhance any living environment, and demand is continuous.

Our wood reproductions capture the essence of this enduring appeal, offering the perfect blend of classic aesthetics and modern functionality. Crafted with precision and attention to detail, our decors bring the beauty of wood into your space, creating an atmosphere of warmth and sophistication.

All our shown and mentioned decors are reproductions.
